

# 8-Port HDMI Switch

---

USER MANUAL

**VS0801H**

## FCC INFORMATION

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instruction manual, may cause interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- ◆ Reorient or relocate the receiving antenna;
- ◆ Increase the separation between the equipment and receiver;
- ◆ Connect the equipment into an outlet on a circuit different from that which the receiver is connected;
- ◆ Consult the dealer or an experienced radio/television technician for help.

## ROHS

This product is RoHS compliant.

## SJ/T 11364-2006

## PACKAGE CONTENTS

The VS0801H 8-port HDMI Switch package contains the following items:

- ◆ 1 VS0801H 8-port HDMI Switch
- ◆ 1 IR Remote Control Unit
- ◆ 1 Power Adapter
- ◆ 1 Rack Mount Kit
- ◆ 1 User Manual\*
- ◆ 1 Quick Start Guide

Check to make sure that all the components are present and that nothing got damaged in shipping. If you encounter a problem, contact your dealer.

Read this manual thoroughly and follow the installation and operation procedures carefully to prevent any damage to the unit, and/or any of the devices connected to it.

---

\* Features may have been added to the VS0801H since this manual was printed. Please visit our website to download the most up-to-date version of the manual.

## OVERVIEW

With more and more HDMI devices entering the Home Theater market, the need for simultaneous access to different HDMI A/V sources is becoming increasingly important. Now, the VS0801H 8-port HDMI Switch offers an easy and affordable way to add HDMI capabilities to your home theater system by allowing you to switch easily between up to eight HDMI A/V sources that are connected to your HDMI display.

With eight HDMI A/V input ports, the VS0801H 8-port HDMI Switch allows you to connect eight HDMI devices (such as an HD camcorder or satellite box, HD-DVD player, hi-def Blu-ray player, home theater PC, stand-alone streaming media player, gaming console, etc.) to your HDMI monitor, display, projector or TV at the same time. The remote control and convenient front panel pushbuttons allow you to quickly and easily toggle between HDMI sources, while the front panel LEDs indicate the source device at a glance. In addition, with Power On Detection, if one HDMI source device is powered off, the VS0801H will automatically switch to the next powered-on device.

Furthermore, for complete system and install integration, RS-232 control is standard through the VS0801H's built-in bi-directional RS-232 serial port that allows the switch to be controlled through a high-end controller, PC, and/or home automation / home theater software package.

## FEATURES

- ◆ Allows up to eight HDMI sources to be connected to one HDMI display
- ◆ Quick and easy switching between HDMI sources via front panel pushbuttons or IR remote control
- ◆ Built-in bi-directional RS-232 serial port for high-end system control
- ◆ Supports Dolby True HD and DTS HD Master Audio
- ◆ Up to 60 Hz refresh rate
- ◆ Long-distance transmission – up to 20 m (24 AWG) and 15 m (28 AWG)
- ◆ Superior video quality – HDTV resolutions of 480p, 720p, 1080i, 1080p (1920x1080); VGA, SVGA, SXGA, UXGA, and WUXGA (1920x1200)
- ◆ HDMI (3D, Deep Color)
- ◆ Plug-and-play – no software installation required
- ◆ DDC compatible
- ◆ HDMI and HDCP 1.1 compatible
- ◆ Consumer Electronics Control (CEC) allows interconnected HDMI devices to communicate and respond to one remote control
- ◆ Signaling rates up to 2.25 Gbits in support of 1080p display
- ◆ All-metal casing
- ◆ Power On Detection – if one of the HDMI source devices is powered off, the VS0801H will automatically switch to the next powered on device
- ◆ Easy and affordable way to add eight HDMI inputs to your home theater system

# SYSTEM REQUIREMENTS

## SOURCE DEVICES(S)

- ◆ HDMI Type A output connector(s)

---

**Note:** A DVI/HDMI adapter is required when connecting a DVI source device.

---

## DISPLAY DEVICE

- ◆ A display device or receiver with an HDMI Type A input connector

## CABLES

- ◆ 1 HDMI cable for each source device you will be connecting
- ◆ 1 HDMI cable for your display device

---

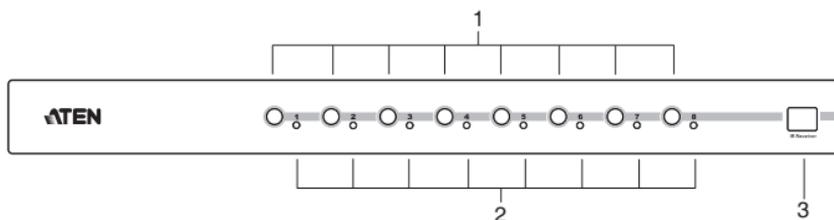

**Note:** 1. No HDMI cables are included in this package. We strongly recommend that you purchase high-quality cables of appropriate length since this will affect the quality of the audio and video display. Contact your dealer to purchase the correct cable sets.

2. If you wish to utilize the VS0801H's high-end serial controller function, you will also need to purchase an appropriate RS-232 cable. See *Installing the RS-232 Controller*, page 11.

---

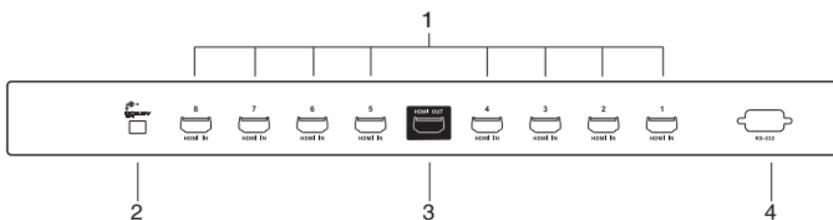

# COMPONENTS

## VS0801H FRONT VIEW

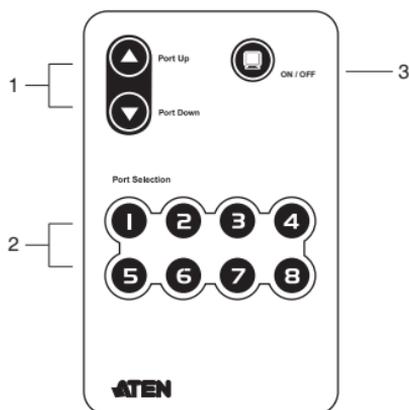

| No. | Component                  | Function  |
|-----|----------------------------|---|
| 1   | Port Selection Pushbuttons | Pressing a port selection pushbutton routes the HDMI source from the corresponding input port to the output port for display.                       |
| 2   | Port LEDs                  | There is one port selected LED next to each port selection pushbutton. This lights green to indicate that the corresponding port has been selected. |
| 3   | IR Receiver                | This receives signals from the IR remote control.   |

## VS0801H REAR VIEW

| No. | Component          | Function   |
|-----|--------------------|--|
| 1   | HDMI In            | The cables from the HDMI source devices plug into any of the eight available ports.    |
| 2   | Power Jack         | The power adapter cable plugs in here.   |
| 3   | HDMI Out           | The cable from the HDMI display device plugs in here.                                  |
| 4   | RS-232 Serial Port | This is the serial remote port for input source selection and high-end system control. |

## IR REMOTE CONTROL

| No. | Component                   | Function  |
|-----|-----------------------------|---|
| 1   | Port Up / Port Down Buttons | Press the Port Up button to cycle forward through the source devices (1 to 2; 2 to 3; ... 8 to 1).<br>Press the Port Down button to cycle backward through the source devices. (8 to 7; 7 to 6; ... 1 to 8) |
| 2   | Port Selection Buttons      | Press a button to bring the focus directly to the source device attached to its associated port.  |
| 3   | On / Off Button             | This button enables / disables the HDMI output.   |

## INSTALLATION

1. Make sure that the power to all devices you will be installing has been turned off.
2. Make sure that all devices you will be installing are properly grounded.

Installation of the VS0801H is simply a matter of plugging in the appropriate cables.

To install the switch, refer to the installation diagram on page 12 as you perform the following three steps:

1. Use an HDMI cable to connect the HDMI input port on the video display device to the HDMI output port on the rear of the VS0801H.
2. Use HDMI cables to connect the HDMI output ports on the source device(s) to the HDMI input ports on the VS0801H. Eight HDMI input ports are located on the rear of the switch.
3. Plug the provided power adapter into an appropriate AC power source; plug the power adapter cable into the Power Jack on the VS0801H.

This completes the basic installation of the VS0801H 8-port HDMI Switch. You may now power on the display and source devices.

### INSTALLING THE RS-232 CONTROLLER

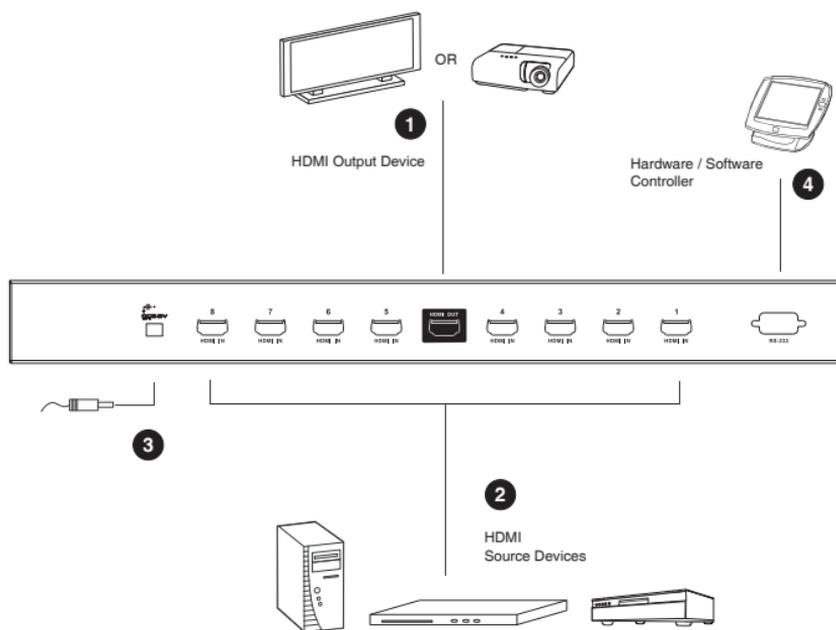

In order to use the RS-232 serial interface to attach a high-end controller (such as a PC) to the VS0801H, use a serial cable such as a modem cable. The end connecting to the VS0801H should have a 9-pin male connector. Connect this to the serial interface on the rear of the VS0801H. Refer to number 4 on the diagram on page 12.

---

**Note:** To configure the controller serial port, see page 14.

---

# INSTALLATION DIAGRAM

## SOURCE DEVICE SELECTION

The VS0801H 8-port HDMI Switch offers easy and flexible source device selection with either the front panel pushbuttons, with the remote control, or through the RS-232 serial interface.

---

**Note:** Whenever the VS0801H is powered on, it automatically selects the first port connected to a powered on source device. You may choose one of the methods outlined below to select a different port.

---

### MANUAL SELECTION

To select a source device, press the pushbutton that corresponds to the port it is connected to.

---

**Note:** The SELECTED LED (green) light indicates which port is currently selected.

---

### REMOTE CONTROL SELECTION

To select a source device with the remote control, press the number button that corresponds to the port it is connected to.

Alternatively, you may also cycle through the source devices by pushing the Port Up and Port Down buttons on the remote control unit.

- ◆ Use the Port Up button to select the next port in ascending order (from left to right on the front view panel).
- ◆ Use the Port Down button to select the next port in descending order (from right to left on the front view panel).

---

**Note:** 1. The maximum range of the remote control unit is 10 meters (30 ft)

2. Aim the remote control unit at the IR receiver located on the front panel of the VS0801H. For optimum performance, make sure there is a clear line-of-sight between the remote control unit and the IR receiver.

---

## RS-232 SERIAL INTERFACE

The VS0801H's built-in bi-directional RS-232 serial interface allows system control through a high-end controller, PC, and/or home automation / home theater software package.

### CONFIGURING THE SERIAL PORT

The controller's serial port should be configured as follows:

|              |       |
|--------------|-------|
| Baud Rate    | 19200 |
| Data Bits    | 8     |
| Parity       | None  |
| Stop Bits    | 1     |
| Flow Control | None  |

### SWITCH PORT COMMANDS

The formulas for Switch Port commands are as follows:

1. Switch Command + Input Port number + Output Port number  
[Enter]

For example, to switch input port 02 to output port 01, input the following:

```
sw i02 o01 [Enter]
```

2. Switch Command + Port Sequence [Enter]

For example, to switch to the next port, input the following:

```
sw + [Enter]
```

The following tables show the possible values and formats for the **Input / Output** port, **Port Number** and the **Port Sequence**:

| Command | Description    |
|---------|----------------|
| sw      | Switch command |

| I/O Port | Description |
|----------|-------------|
| i        | Input Port  |
| o        | Output Port |

| Port number | Description                |
|-------------|----------------------------|
| xx          | 01-08 port (default is 01) |
| yy          | 01 port (default is 01)    |

| Port Sequence | Description   |
|---------------|---------------|
| +             | Next Port     |
| -             | Previous Port |

- 
- Note:**
1. Each command string can be separated with a space.
  2. The **Input / Output** port command string can be skipped, and the default value(s) will be used. For example, to switch the input port 01 to the default output port 01, simply enter: **sw i01**.
  3. The input port and output port command strings are interchangeable. For example: **sw i02 o01** can also be **sw o01 i02**.
- 

## POWER ON DETECTION COMMANDS

The Power On Detection feature is turned on by default.

The formula for Power On Detection commands is as follows:

Power On Detection + Control command [Enter]

For example, to turn off the Power On Detection feature, input the following:

pod off [Enter]

The following tables show the possible values for the **Control** string:

| Command | Description                |
|---------|----------------------------|
| pod     | Power On Detection command |

| Control | Description |
|---------|-------------|
| on      | Turn on     |
| off     | Turn off    |

---

**Note:** Each command can be separated with a space.

---

## VERIFICATION

After entering a command, a verification message appears at the end of the command line as follows:

- ◆ **Command OK** - indicates that the command is correct and successfully performed by the switch
- ◆ **Command incorrect** - indicates that the command has the wrong format and/or values.

## POWERING OFF AND RESTARTING

If you power off the VS0801H, follows these steps before powering it on again:

1. Power off the attached devices.
2. Unplug the power adapter cable from the VS0801H.
3. Wait 10 seconds, and then plug the power adapter cable back in.
4. After the VS0801H is powered on, power on the attached devices.

---

**Note:** Whenever the VS0801H is powered on, it automatically selects the first port connected to a powered on source device.

---

# SPECIFICATIONS

| Function            |                        |          | VS0801H   |
