equipped with standard IR extender receiver and remote control for safe and convenient use source equipment is switched, this switch will respond automatically. In addition, it is control and intelligent function. That is to say, as soon as the power supply of the Switch not only has the key-press-switching function, but also has the IR remote This is a kind of high performance MINI HDMI Switch. This kind of HDMI Amplifier

The output sends the high definition audio/video signals to a high definition display sources simultaneously, compatible well for HD-DVD, SKY-STB, PS3, Xbox36etc display units. All inputs accommodate the connections of the high definition video resolutions up to 1080p) and digital audio from any one of the several sources to This kind of HDMI Amplifier Switch routes high definition video (in multiple

### 2.1 Product

### 2.2 Intelligent Function

- When supplied with power, this switch will select the power-on source device depending on the sequence automatically (input1>input2>input3>input4>input5)
- Once the source device is turned on or plugged in (should stay power-on mode) the switch HD0004 will automatically select this source
- 3) Once the source device is turned off or plugged out, the switch HD0004 will automatically (input1>input2>input3>input4>input5) automatically select the next power-on source depending on the sequence

- When the source devises are on the stand-by mode, its power supply should be turned off, otherwise this switch can not meet intelligent function
- When plugged in or out, this switch is completely intelligent

- Supports12-bit Deep Color
- Supports Full 1080p
- Multifunctional on switching: intelligent or mechanical
- Supports with HDMI High Speed
- High performance up to 2.5Gbps
- Maintains high resolution video beautiful, sharp HDTV resolutions up to 1080p, 2k,
- 1440p graphics and computer resolutions up to 1920 x 1200 are easily achieved
- Included IR extender receiver and IR remote
- With external Power adapter
